

**Unidec**[®]

Support of Validated Process Controls

We:

- Support pharmaceutical manufacturing
- Extend validated legacy equipment life cycle
- Repair process control and monitoring systems
- Perform failure analysis and guidance
- Maintain regulatory compliance

Unidec offers off-site control repairs and on-site support

Pharmaceutical and Biotech Equipment Support

For example, Unidec offers off-site control repairs & on-site support of the following sterile supply equipment controls:

Fedegari[®] Autoclaves

Hamo-Steris[®] Washers

Girton[®] Washers

We help pharmaceutical manufacturers extend end-of-life support on validated systems - allowing them to keep their older systems in place and avoid the long, costly process to validate a replacement system

Trademarks are registered to their respective owners – use of registered trademarks is for identification purposes only in fair use. No claim of ownership or affiliation to the respective trademarks or their owners is made.
